Improving Separation

- separate base and meta namespaces
- avoids name explosion
- easier to adjust meta independent of base

```
make-text-window (~~~)        {lightweight}
make-graphics-window (~~~)    {lightweight}
        ⋮                             ⋮
```

[Lortz & Shin OOPSLA 94]

```
Set<int> parts_list ("space=O(n)
          time=test_membership c=O log(n)")
```
